For authors, students, and beginning as well as experienced indexers, Wellisch (emeritus library and information science, U. of Maryland) covers not only back-of-the-book indexing but also the indexing of periodicals and nonprint material, with practical examples of correct and incorrect indexing. Annotation copyrighted by Book News, Inc., Portland, OR Since 1929 the French expeditions directed by Cl. Schaeffer at the north Syrian port of Ugarit, have produced an intermittent stream of alphabetic tablets, most of which are written in a Semitic language not known as Ugaritic. In 1930, H. Bauer, E. Dhorme and Ch. Virolleaud deciphered enough of the alphabet independently, laying the foundations for the complete decipherment. The purpose of this Textbook is to provide a complete linguistic tool for the study of the Ugaritic tablets. The reader will find ample reference to the specific Ugaritic passages bearing on any point made. Man, he brotherhood, founding fathers. It is argued that such words are and always have been used by educated people to encompass all humanity—men and women. Psychological and historical research in the past few years has produced evidence to the contrary: for most people “false generics” seldom if ever convey a female image, nor are they ancient unchangeable rules of the English grammar that have always been used by the educated. Using hundreds of examples, mostly from published sources, the authors illustrate what certain words are saying to us on a subliminal level. Solutions are supplied that range from word substitutions to suggestions for rewriting. Without a trace of self-conscious righteousness, and with refreshing humor, Miller and Swift provide surprising insights into the English language and the ways in which people use it and are used by it. They demonstrate that to be in command of the language, we must find clear, convincing, and graceful ways to convey our ideas accurately. We must recognize and replace exclusive, distorting, ambiguous, and injurious words. Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs Katz (English, North Carolina State U.) examines the correlation between Reader Response Criticism and the philosophy of science engendered by the Copenhagen School of New Physics, and assesses the scientific empiricism that controls the parameters of reading and writing theory to look at the possibility of teaching reading and writing as “rhetorical music.” He reinterprets Cicero's rhetorical theory in light of recent revisionist scholarship, and sketches a temporal model of affective response in reading and writing. Annotation copyright by Book News, Inc., Portland, OR “Presents the fundamentals of hardware technologies, assembly language, computer arithmetic, pipelining, memory hierarchies and I/O” -- Cutting edge reflections on biblical text formation Empirical models based on ancient Near Eastern literature and variations between different textual traditions have been used to lend credibility to the identification of the sources behind biblical literature and the different editorial layers. In this volume, empirical models are used to critique the exaggerated results of identifying sources and editorial layers by demonstrating that, even though much of ancient literature had such complex literary histories, our methods are often inadequate for the task of precisely identifying sources and editorial layers. The contributors are Maxine L. Grossman, Bénédicte Lemmelijn, Alan Lenzi, Sara J. Milstein, Raymond F. Person Jr., Robert Rezetko, Stefan Schorch, Julio Trebolle Barrera, Ian Young, and Joseph A. Weaks. Features: Evidence that many ancient texts are composite texts with complex literary histories Ten essays and an introduction cover texts from Mesopotamia, the Hebrew Bible, the New Testament, and the Dead Sea Scrolls Surveys the history and development of Mesopotamian and Near Eastern civilization, describing the cultural, technological, political, and economic achievements of the different peoples living there * Comprehensive collection of concise biographies. Over 30,000 entries. Includes birth and death dates, career highlights and historical significance. Provides accurate pronunciations for names." Vols. for 1951-53 include "Authors" and "Subjects." A step-by-step guide to creating comprehensive and usable technical indexes. Numerous surveys indicate that the most common complaint about technical documents concern a poorly designed index--or the lack of an index altogether! An organized, thoughtful index not only ensures that the contents of your book are accessible, but also increases the value of your book. In The Art of Indexing, professional indexer and editorial consultant Larry Bonura addresses the indexing problems specific to technical documentation and presents practical solutions to those problems. The Art of Indexing shows technical writers, editors, and documentation managers how to chart the topics of their books, reports, and documents and present a concise and accurate map that readers, researchers, libraries, bookstores, and reviewers can use to maximize the usefulness of their book. Step-by-step, The Art of Indexing shows you how to become a better indexer by: * Discussing the function of an index * Showing how to estimate indexing time * Presenting methods for selecting entries and subentries * Reviewing reasons for cross-referencing * Describing how to treat locators * Offering an extensive editing checklist for reviewing indexes * Covering indexing for online documents * Including numerous usability tests for verifying the strength of an index * Containing information on indexing standards * Providing sample indexes and a sample indexing style guide * And much more! First multi-year cumulation covers six years: 1965-70. This book provides a wide spectrum of methods to study RNA chaperones in vitro, at the single molecule level, and protocols useful for cell-based assays. Beginning with a section on a number of bacterial proteins for study, the volume also explores proteins from eukaryotic cells and how to delve into the complex interactions between RNA chaperones and the folding and unfolding of proteins. Written for the highly successful Methods in Molecular Biology series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, RNA Chaperones: Methods and Protocols serves as an ideal guide for scientists and students interested in RNA biology and RNA chaperones. This reference provides access to a broad, balanced, and representative collection of Ancient Near Eastern texts that are part of the colorful background to the literature of the Hebrew Bible. "At high noon on a hot summer's day, a beautiful young woman shoots the mayor dead. So begins a story of passion and betrayal in a quiet Tuscan village, leading to a sensational trial. The defence team, headed by the brilliant but unhappy Carlo Rienzi, uncovers a sinister conspiracy of silence that threatens to split the community. Can Carlo persuade the judge to grant clemency in what appears to be an open-and-shut case? Can the law intervene in the brutal tradition of vendetta? An international bestseller, Daughter of Silence is a gripping novel with a masterful twist at the end. Intricate, dramatic, colourful. The Spectator Powerful and authentic. The Daily Telegraph Absorbing, magnificent. The Baltimore Sun" From one of the premier authors in higher education comes a new linear algebra textbook that fosters mathematical thinking, problem-solving abilities, and exposure to real-world applications. Without sacrificing mathematical precision, Anton and Busby focus on the aspects of linear algebra that are most likely to have practical value to the student while not compromising the intrinsic mathematical form of the subject. Throughout Contemporary Linear Algebra, students are encouraged to look at ideas and problems from multiple points of view. An extensive guide for learning how to use the Creo Parametric software for 3D design for manufacturing. Design for manufacturability, DFM, is a product design method that enables efficient manufacturing of products. The guide is published as a series of four individual PDF ebooks. Each book can be used as a textbook during a course or for self-studies. All the templates, formats, sheets and parts showed in each book are available for download. Download links can be found inside the books. The book guides the reader through turning machining with Live Tools and combined milling and turning manufacturing. Taken from: Organizational Behavior, Seventeenth Edition by Stephen P. Robbins and Timothy A. Judge. The Book of Acts in Its Graeco-Roman Setting locates the Book of Acts within various regional and cultural settings in the eastern Mediterranean. These studies draw on recent archaeological fieldwork and epigraphic discoveries to describe the key cities and provinces within the Roman Empire. The relevant societal aspects of these regions, such as the Roman legal system, Roman religion, and the problem of transport and travel, all help contextualize the book of Acts. The "one-stop" reference for authors preparing manuscripts in biblical studies and related fields. Babies as you've never seen them before, from New York Times bestselling author and photographer Seth Casteel Seth Casteel's innovative underwater photography has won him fans around the world. Now Casteel has turned his camera toward the only subjects who could rival his bestselling portraits of dogs and puppies for sheer adorable delight: babies. In what he has called some of the most exciting shoots of his career, Casteel has found a remarkable new way to capture the wonder and freedom babies feel when they're underwater. Chubby-cheeked, curious, and mischievous, these tiny swimmers remind us all of the joy of discovery--and the irresistible beauty of babies. It's the year 2185, and in two weeks, Aloy will turn eighteen and take her father's place as president of the country. But to do so, she must masquerade as a boy to avoid violating the Eco-Accords, four treaties designed to bring the world back from the brink of environmental extinction. Aloy hopes to govern like her father, but she is inheriting a different country. The long concealed Technology Faction is stepping out of the shadows, and as turmoil grows within her country, cryptic threats also arrive from beyond their borders. As she struggles to lead, Aloy maintains her cover by marrying a woman, meanwhile battling feelings for the boy who knows her secret--the boy who is somehow connected to her country's recent upheaval. When assassination attempts add to the turmoil, Aloy doesn't know whom to trust. She understood leadership required sacrifice. She just didn't realize the sacrifice might be her life. From a two-time winner of the Philip K. Dick award, and one of the founding fathers of cyberpunk comes a novel about a very modern nightmare: the most destructive computer virus ever has been traced to your machine. Computer programmer Jerzy Rugby spends his days blissfully hacking away in cyberspace — aiding the GoMotion Corporation in its noble quest to create intelligent robots. Then an electronic ant gets into the machinery ... then more ants then millions and millions of the nasty viral pests appear out of nowhere to wreak havoc throughout the Net. And suddenly Jerzy Rugby is Public Enemy Number One, wanted for sabotage, computer crime, and treason — a patsy who must now get to the bottom of the virtual insectile plague. "Rudy Rucker warms the cockles of my heart ... I think of him as the Scarlet Pimpernel of science fiction." — Philip Jose Farmer This Prodigious New Six-Volume series presents the results of interdisciplinary research between New Testament, Jewish, and classical scholarship. Working to place the Book of Acts within its first-century setting, well-known historians and biblical scholars from Australia, the United States, Canada, Russia, and the United Kingdom have collaborated here to provide a stimulating new study that replaces The Beginnings of Christianity and other older studies on Acts. Starting with the understanding that the Book of Acts is rooted within the setting of the peoples and cultures of the Mediterranean in the first century A.D., this comprehensive series provides a multifaceted approach to the Acts of the Apostles in its literary, regional, cultural, ideological, and theological contexts. The composition of Acts is discussed beside the writing of ancient literary monographs and intellectual biographies. Recent epigraphic and papyrological discoveries also help illumine the text of Acts. Archaeological fieldwork, especially in Greece and Asia Minor, has yielded valuable information about the local setting of Acts and the religious life of urban communities in the Roman Empire. These volumes draw on the best of this research to elucidate the Book of Acts against the background of activity in which early Christianity was born. The Book of Acts in Its Ancient Literary Setting is the first volume in this groundbreaking series. The book includes fourteen chapters devoted to the literary framework that undergirds the Book of Acts. Topics include the text as an historical monograph, ancient rhetoric and speeches, the Pauline corpus, biblical history, subsequent ecclesiastical histories, and modern literary method. All of these chapters arise out of a consultation by the project's scholars at Cambridge in March 1993. Early in the 21st century, after the Great Recession, poet and young mother Maggie Roche is harassed by a lovely woman, Sriyanie, and a famous neuroscientist, David Elfield. She doesn't know it yet, but she is about to become history's first time traveler. When agents from the far future attempt to kill her, in baffled fury she slingshots herself into the 7th millennium. Instantly she's on the run from the UI Lords and their virtual reality devotees. These superbeings are cyborged humans constructed to live forever, with the ambition to rule the universe. Maggie is having none of this. Encountering an earlier version of Sriyanie, her fated future role in the formation of the multiverse falls upon her shoulder like a thunderous lightningbolt. A Being at the end of time she calls the Something wages endless war with its foes, the UI Lords. Torn from her beloved child and her own time, Maggie must choose whether to accept this alienating path into an alternative cosmic history fit for a poet and a free woman.
