Drawing on feminist, postmodern, and psychoanalytic theories, White traces the impact of television's therapeutic and confessional discourses on family construction and consumer culture. In a comprehensive analysis of cable, network, and syndicated progra From The Intuitive Advisor "After 20 years as a medical-intuitive advisor, I realized that teaching people how to listen for the intuitive message behind the disease wasn't enough to help them create true and lasting health.... [A] vital step was missing - namely, how to effectively respond to what their intuition was advising, and how they could learn to heal their lives and assist in healing those around them. "That's when I came to the realization that the health of each of the seven energy centers of the body depends on following a rule that involves balancing two seemingly opposite or contradictory qualities in our lives. I call this set of balancing acts the Seven Rules for Intuitive Health. Just as harmonized brain function depends on having both the left and the right hemispheres in sync, healing body and mind in each of these seven energy centers or chakras involves following a rule to balance dual identities and engage two paradoxical mind-sets simultaneously. "Thus, learning the Seven Rules for Intuitive

Health will help you create a healthy mind and body. Whenever you're in danger of dropping the ball somewhere, you'll intuitively understand the warning signs your body is sending you via your health - and you'll know how to get back on track." Joan Dean offers sound practical guidance to advisers and inspectors at all levels. This includes the development of interpersonal skills, interviewing, organising advisory teams and managing one's own work. Co-published with NACADA A large and growing number of academic advisors are interested in researching and publishing scholarly inquiry in academic advising. Since the first edition of this book was published, the scope of relevant inquiry has widened and deepened, and public attention and accountability is at an all-time high. This second edition of *Scholarly Inquiry in Academic Advising* provides scholar-practitioners with methodological perspectives from each of the major ways of knowing: the social sciences, including qualitative, quantitative, and now mixed methods approaches; the arts; the humanities; and the natural sciences. This book is a vade mecum for researchers in academic advising to formulate research questions, structure research, point to useful theoretical and methodological approaches, guide analysis, and help find publication outlets. Authors from a multitude of backgrounds seek to raise the level of discourse about academic advising, to illustrate its history, to reflect on how research can foster new perspectives, and to connect with and foster social justice, internationality, and inclusivity. This volume will assist those who seek to push back the frontiers of knowledge in the field, because it serves as a handbook for advising scholars, whatever their epistemological, theoretical, axiological, and methodological predilections. As for practitioners, this book "raises the bar" and conveys to even non-researching practitioners that scholarly inquiry in academic advising is a desirable avenue to professional development that must inform their practice. *Advising in Language Learning (ALL)* brings together examples of advising practice and research from various international contexts in a fast-developing field. A theoretical model based on constructivism and sociocultural theory (the "Dialogue, Tools and Context Model") is proposed and supported throughout the book, as each of the contributions focuses on one or more areas of the model. In this volume the editors set out the general aims and understandings of the field, illustrating the innovative manner in which advisors around the world are working with learners and researching the practice of ALL. "Time bombs," "Trojan Horses" and "Dithering Hamlets" were all part of the everyday jargon of the World War II's ultra-Secretive Political Warfare Executive (PWE). The PWE's instructors used these terms in the training of the next generation of propagandists and political warriors. The *Political Warfare Executive Syllabus* reveals for the first time what it took to become a propagandist in what was then the most elite psychological warfare unit in the world. Under the maxim that a good propagandist is trained not born, the lecturers of the PWE Training School at Woburn Abbey and then Brondesbury systematically explored every aspect of how to deliver a lethal dose of propaganda to the enemy and then a purgative and curative dose in the peace that followed. The views of the PWE's instructors were controversial. This is significant because they would play an important, if hidden, role in how Europe is developing even today. For example, they held a low opinion of the French in general and considered that they had been reduced to the level of "dithering Hamlets" by the German "Trojan Horses" even before the first German tank had crossed the Belgian frontier. On the dark side of PWE operations, they were not above killing the prostitutes

whose brothels served the German U-Boot fleet in order to amplify their propaganda message. Perhaps most significant is that they saw Great Britain as European and espoused a Europe that looks very much like the European Union of the early 21st Century. However, there is one important difference. They saw this Greater Europe as accepting the British way of life and being led by Great Britain and not embracing American culture under German leadership. This first volume introduces the reader to the history and theory of political warfare as seen through the eyes of the inheritors of Lord Northcliffe's Crewe House. Drawing on J. F. C. Fuller and his concept of a war fought in the mind without armies, it establishes the theoretical parameters of political warfare. This is a reproduction of the original artefact. While most Marines think of the Vietnamese Marine Corps as the primary advisory experience during that conflict, Marines served with other programs. One of these is the subject of this study: Marine advisors with the Vietnamese Provincial Reconnaissance Units (PRUs). This narrative is a combination of experience, research, and reflection. While other journalistic or academic accounts have been published, this is a narrative of participants. Many historians consider the two most effective counterinsurgency organizations employed during the Vietnam War to have been the PRU and USMC Combined Action Platoons (CAP). The author believes that both of these programs have applicability in any counterinsurgency where U.S. forces are called upon to assist a host government. They had been founded, with the help of foreign military aid, to fight the various conflicts to contain communist expansion in the region. Also present at various times were other Marines from the Netherlands, France, and Great Britain. The beginnings of the Cold War witnessed this proliferation of amphibious forces in Asia, in part because of the reputation the U.S. Marines had earned in the cross Pacific drive against Japan and in other postwar confrontations. This publication is about one of these, the Vietnamese Marine Corps or Thuy Quan Luc Chien (TQLC). This occasional paper provides documents on the topics of the Vietnamese Marines and the U.S. Marine Advisory Unit from this period. Marine Corps History Division Occasional Paper. essays on *The Taming of the Shrew*, and includes extensive discussions of the play's various printed versions and its theatrical productions. Aspinall has included only those essays that offer the most influential and controversial arguments surrounding the play. The issues discussed include gender, authority, female autonomy and unruliness, courtship and marriage, language and speech, and performance and theatricality.

The chapters published in this volume provide cutting edge ideas by leading scholars, and help to inform mergers and acquisitions research around the world. This landmark work illustrates the progress that has been made in financial markets and assesses innovations that provide solutions to dilemmas and increase efficiency. These articles break down the complex web of relationships between the financial intermediary, the managers of corporations, shareholders, creditors, analysts and regulators. If complete information was disseminated to all participants, and all participants were ethical and competent, there would be less need for research on financial markets. Given the numerous conflicts of interest, the research included in these volumes attacks existing problems in financial markets in search of a solution. The research also identifies problems that have gone unnoticed. Research on financial markets identifies more problems in financial markets than it solves. Nevertheless, the research findings can help one use financial markets to one's advantage, rather than be used by them. This new edition to the SAGE Library in Business and Management discloses relevant research about the environment and behaviour within each of several financial markets so that participants can make informed decisions. It also hints at some of the unresolved issues in financial markets that are likely to receive more attention in future financial research.**

Gerald "Jerry" Kerr was born in 1920 in Kansas, the Heartland of the United States. In his early years, there were no modern appliances, and everything was done by manual labor. He describes how movies went from black and white, silent films to sound and color. In 1929 the Stock Market crashed and he lived through the Great Depression and terrible dust storms in the Mid-west. Hitler started WWII in 1939 and Japan attacked the U.S. Navy in Pearl Harbor on Dec. 7, 1941. The author was drafted into the Army, went to OCS and became a 2nd Lieutenant. He married and was sent to New Guinea and at the end of the war, took in some of the first troops to occupy Japan. He saw his eighteen months old son for the first time when he returned home. Kerr was in the army for twenty-two years and retired in 1964. During his Army Career, he had

three tours of duty in the Pentagon, a tour in Rio de Janeiro, Brazil, Bangkok, Thailand, and received an MBA from Syracuse University. His wife contracted Alzheimer's and passed away in the 80's and he later married a Texas lady. He lived four score of the 20th Century, and experienced the fantastic advances made in transportation, communications, electronics and medicine. Computers put men on the moon and more progress was made in that one century than in all of the time before. This made it "Living in the Greatest Century". Covering the five key areas of financial planning, this guide emphasizes its technical, tax, and regulatory aspects. The areas of discussion include investments, employee benefits and retirement plan assets, insurance, income tax and estate planning, and regulatory issues. It has been said that the only thing new in the world is the history you don't know. This Global War on Terrorism (GWOT) Occasional Paper (OP) is a timely reminder for the US Army about the history we do not know, or at least the history we do not know well. The Army has recently embarked on massive advisory missions with foreign militaries in Iraq, Afghanistan, and elsewhere around the globe. We are simultaneously engaged in a huge effort to learn how to conduct those missions for which we do not consistently prepare. Mr. Robert Ramsey's historical study examines three cases in which the US Army has performed this same mission in the last half of the 20th century. In Korea during the 1950s, in Vietnam in the 1960s and 1970s, and in El Salvador in the 1980s the Army was tasked to build and advise host nation armies during a time of war. The author makes several key arguments about the lessons the Army thought it learned at the time. Among the key points Mr. Ramsey makes are the need for US advisors to have extensive language and cultural training, the lesser importance for them of technical and tactical skills training, and the need to adapt US organizational concepts, training techniques, and tactics to local conditions. Accordingly, he also notes the great importance of the host nation's leadership buying into and actively supporting the development of a performance-based selection, training, and promotion system. To its credit, the institutional Army learned these hard lessons, from successes and failures, during and after each of the cases examined in this study. However, they were often forgotten as the Army prepared for the next major conventional conflict. These lessons are still important and relevant today. In fact, prior to its publication the conclusions of this study were delivered by the author to several of the Army's current advisory training task forces.
