***Dying to Please* Oct 22 2021 Loyal. Beautiful. Professional. Impeccably organized. Potentially lethal. Sarah Stevens is a woman with many distinct qualities. First and foremost a butler par excellence, skilled at running large households smoothly and efficiently, she is also a trained bodyguard and expert marksman-indispensable to her elderly employer, a courtly gentleman whom Sarah has come to respect and love as a father. Then one night she thwarts a burglary in progress, a courageous act that rewards Sarah her requisite "fifteen minutes of fame" with the local press. But the exposure is enough to catch the attention of a tortured soul who, unbeknownst to Sarah, will stop at nothing to have her for himself. Sarah's perfectly ordered life is shattered when tragedy strikes: her beloved employer is brutally murdered. The detective investigating the case, assures Sarah that she is not a suspect. Until lightning strikes twice. There's a second killing-and this time, despite a lack of evidence connecting her to the crime, Sarah cannot escape the shadow of guilt. The only option left for Sarah is to carry on with her life. But she doesn't realize that a deranged stalker is luring her into an elaborate trap . . . one in which she, once ensnared, might never**

escape. For Sarah soon finds herself at the mercy of a man who will tend to her every whim, smother her with affection, and crush her in his all-consuming embrace. In a nonstop roller-coaster ride of unrelenting suspense, Linda Howard has written her most chilling novel yet. Dying to Please is a breathless thriller of desire and obsession.

Top Five Regrets of the Dying Nov 10 2020
Revised edition of the best-selling memoir that has been read by over a million people worldwide with translations in 29 languages. After too many years of unfulfilling work, Bronnie Ware began searching for a job with heart. Despite having no formal qualifications or previous experience in the field, she found herself working in palliative care. During the time she spent tending to those who were dying, Bronnie's life was transformed. Later, she wrote an Internet blog post, outlining the most common regrets that the people she had cared for had expressed. The post gained so much momentum that it was viewed by more than three million readers worldwide in its first year. At the request of many, Bronnie subsequently wrote a book, The Top Five Regrets of the Dying, to share her story. Bronnie has had a colourful

and diverse life. By applying the lessons of those nearing their death to her own life, she developed an understanding that it is possible for everyone, if we make the right choices, to die with peace of mind. In this revised edition of the best-selling memoir that has been read by over a million people worldwide, with translations in 29 languages, Bronnie expresses how significant these regrets are and how we can positively address these issues while we still have the time. The Top Five Regrets of the Dying gives hope for a better world. It is a courageous, life-changing book that will leave you feeling more compassionate and inspired to live the life you are truly here to live.

Sandman Slim Jun 17 2021 “An addictively satisfying, deeply amusing, dirty-ass masterpiece.” —William Gibson “A sharp-edged urban fantasy, drenched in blood and cynicism, tipping its hat to Sam Peckinpah, Raymond Chandler, and the anti-heroes of Hong Kong cinema....A bravura performance.” —San Francisco Chronicle “I couldn’t put it down.” —Charlaine Harris Sandman Slim has arrived—a wild and weird, edge-of-your-seat supernatural roller-coaster rider that propels author Richard Kadrey to the forefront of the fantasy, thriller,

and a host of other literary genres. This spellbinding, utterly remarkable tale of a vengeful magician/hitman's return from hell is part H.P. Lovecraft, part Christopher Moore, part Jim Butcher, and totally, unabashedly dark, twisted, and hilarious.

Euthanasia Jan 13 2021 "The common good of the community will be harmed if killing by assisted suicide wins acceptance." "If individual freedom entitles a sick person in pain to assisted suicide, how can it be denied to someone wishing to die who is not sick and in pain?" Euthanasia and assisted suicide are sweeping across Australia as one State after another passes laws permitting doctors to kill patients who request it. But legalisation of euthanasia is a one-way ratchet asserting the primacy of individual choice. Euthanasia advocates insist nothing can ever outweigh that choice. But in this book, Peter Kurti argues these demands need to be resisted because of the impact individual choice about assisted suicide will have on wider society - on the family, on friends, on the local community. Legalising euthanasia and assisted suicide - 'voluntary assisted dying' - enshrines in law a rejection of the duties we owe to others and the claims others have upon us. It

will destroy family relationships, damage the trust we place in the medical profession, and corrode the bonds of civil society forged between individuals within communities. In his answers to seven key questions about euthanasia and voluntary assisted dying, Kurti argues that when society permits some of its citizens to be killed, it tears the fabric of community and threatens to put the culture itself to death. Peter Kurti is a Senior Research Fellow at the Centre for Independent Studies and also Adjunct Associate Professor in the School of Law at the University of Notre Dame Australia. He has written extensively about issues of religion, liberty, and civil society in Australia, and is the author of *The Tyranny of Tolerance: Threats to Religious Liberty in Australia* and *Sacred & Profane: Faith and Belief in a Secular Society*.

***Suicide* Sep 01 2022 This is a frank, compassionate book written to those who contemplate suicide as a way out of their situations. The author issues an invitation to life, helping people accept the imperfections of their lives, and opening eyes to the possibilities of love.**

Dying to be Free: How America's Ruling Class Is

Killing and Bankrupting Americans, and What to Do About It Aug 27 2019 Americans today are dying for want of freedom. Despite being told over and over again that they are free, the truth is that Americans have little freedom left. This is due to the rise of an oligarchy of technocrats who now rule our society in violation of the Constitution and the Bill of Rights. These people are totalitarian technocrats. They seek complete control over individuals and therefore society under the guise of "public health and safety." Every freedom we are now denied, is denied to us for the sake of protecting us from ourselves and from our fellow Americans. We have recently reached what I believe will be the high-watermark of this technocracy - forced vaccination. I believe that if anything threatens the health of the American people, it is the evil agenda of these technocrats, whether they are pushing mask-wearing, vaccination, water-fluoridation, or even things as innocuous as hand washing. As much as it may surprise you to hear this from a doctor, my reasons for concern are based on an abundance of evidence and experience, and are shared by doctors and scientists all over the world. The time has come for Americans to reckon with the failures of their

public health experts and institutions, and to proclaim themselves free from their destructive and divisive policies. In this book, I reveal the true causes of America's public health crisis and provides insight into how to regain our health as individuals and as a nation. - Leland Stillman, MD

Free Rein to Kill Jan 25 2022 Free Rein to Kill chronicles the heart-wrenching true story of an elderly patient who was admitted to the hospital with an impacted bowel and involuntarily euthanized after being incorrectly diagnosed with end-stage cancer. Coauthors Maddie Kisha and Paula Andrasko allege that the Florida doctors caring for their father, Paul Joseph Vertucci, Sr., neglected his impacted bowel and inaccurately diagnosed end-stage cancer, claiming that the disease had metastasized and was therefore incurable. Released with in-home hospice care, his daughters' determination and love were not enough to save him-Vertucci eventually died from morphine-related complications. Kisha and Andrasko contend that their father was involuntarily euthanized due to the ramifications of the Florida Wrongful Death Act-alleging that the state legislation gives doctors, hospitals and insurance companies free rein to kill. The authors bring the controversial

subject of euthanasia to the forefront as they recount the rich and loving relationship they shared with their beloved father.

The Kyle Swanson Sniper Series, Books 1-3 Oct 10 2020 Jack Coughlin, the Marine Corps' top-ranked sniper and author of New York Times bestseller Shooter, follows Gunnery Sgt. Kyle Swanson's action-packed top secret missions in the Middle East in the Kyle Swanson Sniper Series, Books 1-3. In Kill Zone, Kyle Swanson receives orders to mount a top secret mission to rescue an American general captured in the Middle East by terrorists who threaten to behead him. In Dead Shot, Swanson faces his most deadly enemy yet, a legendary enemy sniper working with a fringe Islamic organization that has created a terrifying new weapon of mass destruction. In Clean Kill, an attempt at a new peace in the Middle East is shattered by an unknown attacker, and only Swanson can find out who's responsible.

Dying for the Faith, Killing for the Faith Feb 23 2022 The history of influence of the old testamentary Maccabees is the focus of the essays collected in this book, which extend thematically and chronologically from the cult of martyrs in late antiquity to the time of the

modern wars of liberation.

Soldaten - On Fighting, Killing and Dying Jun 29 2022 In November 2001, as the world still reeled from the attack on the Twin Towers, German historian Sonke Neitzel discovered an extraordinary cache of documents from the Second World War. The documents were the transcripts of German prisoners of war talking among themselves in prisoner of war camps, and secretly recorded by the allies. In these apparently private conversations the soldiers talked freely and openly about their hopes and fears, their concerns and their day-to-day lives. With a banality and ease which to the modern reader can appear shocking, they also talked about the horrors of war -- about rape, death and killing. Sonke Neitzel shared the material with renowned and bestselling psychologist Harald Wezler and they set about trying to make sense of the vast piles of documents, the hours of transcripts. The result is **SOLDATEN**, a landmark book which will change the way we look at soldiers and war, and is as relevant to our modern conflicts in Iraq and Afghanistan as it was to the soldiers of the German Army in 1945. Published to huge acclaim and controversy in Germany it was a number one bestseller there

and reignited the debate about the banality of evil under the Nazi regime.

The Roots of Bioethics Dec 12 2020 Daniel Callahan's life time work in bioethics has again and again returned to the root problems of health, progress, technology, and death. How we think about each of them individually and in relation to each other will shape the way we approach and deal with the most common dilemmas of modern medicine. They are at the roots of the field.

You Can't Kill a Dead Man Apr 15 2021 Vanessa Sterling has abandoned the all consuming life of a Chicago corporate lawyer to begin a new life in the sleepy fishing village of Depoe Bay, Oregon. But a serious challenge arises when a long-lost son returns and the past reemerges to entangle her in a web of lies, deceit, and betrayal—the depths of which not only threaten her moral fiber, but her very existence. To save her son from his sordid past, this misguided mother begins to unravel deadly family secrets, pulling her into the seedy underworld of a drug czar, only to discover her son is not so innocent. A native of Detroit, Michigan, Fran Blacketer moved to California in the late 1970s where she earned a master's degree in psychology and

taught at Saddleback College. She lived in Laguna Beach where she met her artist husband, Jim, and they moved to Depoe Bay, Oregon for six years before returning to southern California. While in Oregon she found the central coast to be a haven for writers where mystery and intrigue seemed to permeate the rugged coast line. "You Can't Kill a Dead Man" is the first novel in a series of Vanessa Sterling mysteries.

Killing and Dying Jan 05 2023 "One of the most gifted graphic novelists of our time." —Wired
Killing and Dying is a stunning showcase of the possibilities of the graphic novel medium and a wry exploration of loss, creative ambition, identity, and family dynamics. With this work, Adrian Tomine (*Shortcomings*, *Scenes from an Impending Marriage*) reaffirms his place not only as one of the most significant creators of contemporary comics but as one of the great voices of modern American literature. His gift for capturing emotion and intellect resonates here: the weight of love and its absence, the pride and disappointment of family, the anxiety and hopefulness of being alive in the twenty-first century. "Amber Sweet" shows the disastrous impact of mistaken identity in a hyper-connected world; "A Brief History of the Art Form Known as

Hortisculpture" details the invention and destruction of a vital new art form in short comic strips; "Translated, from the Japanese" is a lush, full-color display of storytelling through still images; the title story, "Killing and Dying", centers on parenthood, mortality, and stand-up comedy. In six interconnected, darkly funny stories, Tomine forms a quietly moving portrait of contemporary life. Tomine is a master of the small gesture, equally deft at signaling emotion via a subtle change of expression or writ large across landscapes illustrated in full color. Killing and Dying is a fraught, realist masterpiece.

***Everything Is Going to Kill Everybody* Dec 24 2021 Just when you thought you'd accepted your own mortality . . . Everything Is Going to Kill Everybody is bringing panic back. Twenty illustrated, hilariously fear-inducing essays reveal the chilling and very real experiments, dangerous emerging technologies, and terrifying natural disasters that soon could—or very nearly already did—bring about the end of humanity. In short, everything in here will kill you and everyone you love. At any moment. And nobody's told you about it—until now: • Experiments in green energy like the HiPER, which uses massive lasers to create a tiny**

“contained” sun; it’s an idea that could save the world if it doesn’t consume us all in a fiery fusion reaction first. • Global disasters like the hypercane—a hurricane so large it could cover all of North America and shoot trailer parks into space! • Terrifying new developments in robotics like the EATR, which powers itself on meat—an invention in the running for “Worst Decision Made by Anybody.”

DYING TO KILL Dec 04 2022 This is a comprehensive study of euthanasia and assisted suicide. It traces the historical debate, examines the legal status of such activity in different countries and explores the political, medical and moral matters surrounding these emotive and controversial subjects in various cultural contexts. The key advocates and pioneers of this agenda-driven movement (such as the late Jack Kevorkian, popularly known as “Dr. Death” and Philip Nitschke, founder of Exit International) are profiled. Not only are the elderly and disabled becoming increasingly vulnerable but children, psychiatric patients, the depressed and those who are simply tired of life are now on a slippery slope into a dystopian nightmare. The spotlight is brought to bear on the Netherlands, in particular, where palliative care and the hospice

movement are greatly underdeveloped as a result of legalization. These dubious “services” are now offered as part of “normal” medical care in Holland where it is deemed more cost-effective to be given a lethal injection. The vital role of physicians as healers in society must be preserved and the important but neglected spiritual dimension of death must be explored. Thus a biblical view of human life is presented. Death and bereavement are universal phenomena and people of all faiths and those of none have a legitimate right to comment. However, the historic Christian tradition is struggling to be heard in the clamor for personal autonomy and civil liberties in a multi-cultural society that is becoming increasingly secular. This work provides an ethical framework in which euthanasia and assisted suicide can be evaluated. These issues are on the radar indicating a collision course with Christian values. It is time for Christians to be alert and to present the case that these are not satisfactory solutions to legitimate end-of-life concerns.

Summer Blonde Jan 31 2020 Adrian Tomine's cult comix series Optic Nerve is finally collected into one sharp-looking hardcover graphic novel. Described as the Raymond Carver of comix,

Tomine constructs tales of emotional disconnection with an ear for painfully real dialogue. Combined with his deft black and white depictions of urbane lifestyles, Tomine's fans have often accused him of eavesdropping in on their most intimate moments and, with forensic skill, laying their lives bare. The conflicts between emotional gratification, narcissistic neediness and moral discernment mark the title story - "Summer Blonde" - in which a socially crippled man nurses an obsessive crush on a young woman. He watches close up, paralyzed by his guilt, as her beauty catches the eye of his neighbor: a hip, selfish young man with a short attention span. One of Optic Nerve's most popular stories, `Hawaiian Getaway,` features Hilary, telephone service rep who is having the worst week of her life. She lost her job, her apartment, and her grandmother. Close to the edge, she is losing her grip. Reaching out to random strangers on the phone, Hilary is looking for someone to help her. In "Alter Ego" a successful young author has writer`s block. He can`t, or won`t, decide between another ghostwriting gig and finishing his second `real' novel. He stalls on committing to his novel and his girlfriend when a chance postcard leads him

to flirt with fantasies of changing the past. Finally, "Bomb Scare" documents the early unease of his generation by setting this coming-of-age story during the tense months of the Gulf War, the event that ushered in the 1990s.

Medical Treatment of the Dying Sep 28 2019

Natural Causes Jul 31 2022 A New York Times bestseller! From the celebrated author of *Nickel and Dimed*, Barbara Ehrenreich explores how we are killing ourselves to live longer, not better. A razor-sharp polemic which offers an entirely new understanding of our bodies, ourselves, and our place in the universe, **NATURAL CAUSES** describes how we over-prepare and worry way too much about what is inevitable. One by one, Ehrenreich topples the shibboleths that guide our attempts to live a long, healthy life -- from the importance of preventive medical screenings to the concepts of wellness and mindfulness, from dietary fads to fitness culture. But **NATURAL CAUSES** goes deeper -- into the fundamental unreliability of our bodies and even our "mind-bodies," to use the fashionable term. Starting with the mysterious and seldom-acknowledged tendency of our own immune cells to promote deadly cancers, Ehrenreich looks into the cellular basis of aging, and shows how little

control we actually have over it. We tend to believe we have agency over our bodies, our minds, and even over the manner of our deaths. But the latest science shows that the microscopic subunits of our bodies make their own "decisions," and not always in our favor. We may buy expensive anti-aging products or cosmetic surgery, get preventive screenings and eat more kale, or throw ourselves into meditation and spirituality. But all these things offer only the illusion of control. How to live well, even joyously, while accepting our mortality -- that is the vitally important philosophical challenge of this book. Drawing on varied sources, from personal experience and sociological trends to pop culture and current scientific literature, NATURAL CAUSES examines the ways in which we obsess over death, our bodies, and our health. Both funny and caustic, Ehrenreich then tackles the seemingly unsolvable problem of how we might better prepare ourselves for the end -- while still reveling in the lives that remain to us.

Why Kill the Innocent Aug 08 2020 In this paperback reprint, a brutal murder draws nobleman Sebastian St. Cyr into the tangled web of the British royal court in this gripping

historical mystery from the national bestselling author of *Where the Dead Lie*. London, 1814. As a cruel winter holds the city in its icy grip, the bloody body of a beautiful young musician is found half-buried in a snowdrift. Jane Ambrose's ties to Princess Charlotte, the only child of the Prince Regent and heir presumptive to the throne, panic the palace, which moves quickly to shut down any investigation into the death of the talented pianist. But Sebastian St. Cyr, Viscount Devlin, and his wife, Hero, refuse to allow Jane's murderer to escape justice. Untangling the secrets of Jane's world leads Sebastian into a maze of dangerous treachery where each player has his or her own unsavory agenda and no one can be trusted. As the Thames freezes over and the people of London pour onto the ice for a Frost Fair, Sebastian and Hero find their investigation circling back to the palace and building to a chilling crescendo of deceit and death . . .

**In Love Oct 29 2019 NEW YORK TIMES

Post) “A pleasure to read . . . Rarely has a memoir about death been so full of life. . . . Bloom has a talent for mixing the prosaic and profound, the slapstick and the serious.”—USA Today ONE OF THE BEST BOOKS OF THE YEAR: NPR

Amy Bloom began to notice changes in her husband, Brian: He retired early from a new job he loved; he withdrew from close friendships; he talked mostly about the past. Suddenly, it seemed there was a glass wall between them, and their long walks and talks stopped. Their world was altered forever when an MRI confirmed what they could no longer ignore: Brian had Alzheimer’s disease. Forced to confront the truth of the diagnosis and its impact on the future he had envisioned, Brian was determined to die on his feet, not live on his knees. Supporting each other in their last journey together, Brian and Amy made the unimaginably difficult and painful decision to go to Dignitas, an organization based in Switzerland that empowers a person to end their own life with dignity and peace. In this heartbreaking and surprising memoir, Bloom sheds light on a part of life we so often shy away from discussing—its ending. Written in Bloom’s captivating, insightful voice and with her trademark wit and candor, In

Love is an unforgettable portrait of a beautiful marriage, and a boundary-defying love.

Shortcomings Nov 30 2019 From the pre-eminent cartoonist of his generation, the most anticipated graphic novel of 2007 Shortcomings, Adrian Tomine's first long-form graphic novel, is the story of Ben Tanaka, a confused, obsessive, Japanese-American male in his late-twenties, and his cross-country search for contentment (or at least the perfect girl). Along the way, Tomine tackles modern culture, sexual mores, and racial politics with brutal honesty and lacerating, irreverent humor, while deftly bringing to life a cast of painfully real anti-hero characters. A frequent contributor to The New Yorker, Tomine has acquired a cult-like fan following and has earned a status as one of the most widely-acclaimed cartoonists of our time. Shortcomings was serialized in Tomine's iconic comic book series Optic Nerve and was excerpted in McSweeney's Quarterly Concern #13.

Soldiers Mar 15 2021 On a visit to the British National Archive in 2001, Sönke Neitzel made a remarkable discovery: reams of covertly recorded, meticulously transcribed conversations among German POWs during World War II that recently had been declassified.

Neitzel would later find another collection of transcriptions, twice as extensive, in the National Archive in Washington, D.C. These discoveries, published in book form for the first time, would provide a unique and profoundly important window into the true mentality of the soldiers in the Wehrmacht, the Luftwaffe, the German navy, and the military in general—almost all of whom had insisted on their own honorable behavior during the war. Collaborating with renowned social psychologist Harald Welzer, Neitzel examines these conversations—and the casual, pitiless brutality omnipresent in them—to create a powerful narrative of wartime experience. Dying for a Paycheck Jul 19 2021 "In this timely, provocative book, Jeffrey Pfeffer contends that many modern management commonalities such as long hours, work-family conflict, and economic insecurity are toxic to employees--hurting engagement, increasing turnover, and destroying people's physical and emotional health--while also being inimical to company performance. He argues that human sustainability should be as important as environmental stewardship. You don't have to do

a physically dangerous job to confront a health-destroying, possibly life-threatening workplace....In "Dying for a Paycheck", Jeffrey Pfeffer marshals a vast trove of evidence and numerous examples from all over the world to expose the infuriating truth about modern work life: even as organizations allow management practices that actually sicken and kill their employees, those policies do not enhance productivity or the bottom line, thereby creating a lose-lose situation. Exploring a range of important topics, including layoffs, health insurance, work-family conflict, work hours, job autonomy, and why people remain in toxic environments, Pfeffer offers guidance and practical solutions that all of us--employees, employers, and the government--can use to enhance workplace well-being. We must wake up to the dangers and enormous costs to today's workplace, Pfeffer argues. "Dying for a Paycheck" is a clarion call for a social movement focused on human sustainability. Pfeffer makes clear that the environment we work in is just as important as the one we live in, and with this urgent book he opens our eyes and shows how we can make our workplaces healthier and better."--jacket flaps

***Between the Dying and the Dead* Jul 07 2020 Dr. Jack Kevorkian the enigmatic and intrepid physician dubbed Dr. Death has for years declined public interviews about his life and the events that led him to be a vehement advocate of doctor-assisted suicide for terminally ill patients. But here, finally, is his own life story, as told to Neal Nicol and Harry Wylie. Dr. Kevorkian gained international notoriety in the 1990s for his passionate advocacy of choice for terminal patients, who have increasingly won the right to decide the time, place, and method of their own death in several western countries. In 1998, he assisted Thomas Youk, a terminally ill patient suffering from Lou Gehrig's disease, with a lethal injection that was broadcast on CBS's 60 Minutes. Immediately thereafter, Kevorkian was arrested, charged with second-degree murder, tried, and sentenced to 10-25 years in Michigan's maximum-security prison system. Today, Dr. Kevorkian is in his late seventies and in failing health himself. He shares an eight-by-twelve-foot cell with another inmate in the Thumb Correctional Facility at Lapeer, Michigan. The unique story Prisoner Number 284797 shares far exceeds the battle to legalize euthanasia and end human suffering for terminal patients.**

Dying of Whiteness Oct 02 2022 A physician reveals how right-wing backlash policies have mortal consequences -- even for the white voters they promise to help Named one of the most anticipated books of 2019 by Esquire and the Boston Globe In the era of Donald Trump, many lower- and middle-class white Americans are drawn to politicians who pledge to make their lives great again. But as Dying of Whiteness shows, the policies that result actually place white Americans at ever-greater risk of sickness

and death. Physician Jonathan M. Metzl's quest to understand the health implications of "backlash governance" leads him across America's heartland. Interviewing a range of everyday Americans, he examines how racial resentment has fueled progun laws in Missouri, resistance to the Affordable Care Act in Tennessee, and cuts to schools and social services in Kansas. And he shows these policies' costs: increasing deaths by gun suicide, falling life expectancies, and rising dropout rates. White Americans, Metzl argues, must reject the racial hierarchies that promise to aid them but in fact lead our nation to demise.

The Art of Dying May 05 2020 Although the representation of suicide is commonplace in literature, few studies have explicitly dealt with the meaning of suicide in the works of women writers. The Art of Dying applies theories concerning the division of women literary figures into angels or monsters to representative literary suicides of the nineteenth century, including the suicides of women characters in works by Kate Chopin and Sylvia Plath. The Awakening by Kate Chopin is often misunderstood by critics who read it using the Romantic paradigm. Chopin breaks that

paradigm by presenting the suicide of Edna Pontellier as heroic. Suicide is a prevalent motif and theme in two works by Sylvia Plath, *The Bell Jar* and *Ariel*. An extensive analysis of Plath's last poem «Edge» portrays the suicide of the speaker as a calm and heroic act in keeping with the tone set by Chopin in *The Awakening*. *The Art of Dying* concludes by exploring women's need for self-actualization within the framework of love, marriage, and motherhood - institutions that have always demanded from women an unnatural and harmful degree of unselfishness. The inherent message in the works of artists such as Chopin and Plath is that women should not have to die in order to live.

Why You Shouldn't Kill Yourself Feb 11 2021

Suicide, for years, has been a public health crisis in the Western world. Yet more and more states and countries are allowing physician assisted suicide or euthanasia. Have you wondered whether it is actually wrong to end your life if you are mortally ill? Susan Windley-Daoust engages in an extended discussion with a game dialogue partner who thinks that there are five good reasons to employ physician-assisted suicide--and proves those common reasons (or "tricks of the heart") may be well-intended, but make no moral or spiritual sense. She argues that PAS is based in medical ignorance, a utilitarian understanding of the human, and a spiritual vacuum--and the Christian Church needs to engage these realities quickly and directly by recovering the art of dying well. This book is written to all those considering the issue, from those considering PAS as an option in their own lives, to those called upon to vote on the legality of PAS in their states, to those who minister to the dying.

Dying to Win Sep 08 2020 A sobering, thought-provoking study of suicide terrorism analyzes the political logic and motivations behind the phenomenon, charting incidents of suicide terrorism around the world since World War II,

Kill and Tell Nov 22 2021 "Still reeling from her mother's recent death, Karen Whitlaw is stunned when she receives a package containing a mysterious notebook from her estranged father, whom she has barely seen since his return from the Vietnam War decades ago. Then, a shocking phone call: Karen's father has been murdered on the gritty streets of New Orleans. For homicide detective Marc Chastain, something about the case of a murdered homeless man just doesn't add up--especially after he meets the victim's daughter. Far from the cold woman he expected, Karen Whitlaw is warm and passionate. She is also in serious danger. A string of 'accidents' have shaken Karen to the core, and forced her into the protective embrace of the charming detective she vowed to resist. Together they unravel a disturbing story of politics, power, and murder--and face a killer who will stop at nothing to get his hands on her father's secrets."--Amazon

***The American Dream Is Not Dead* May 17 2021**
Populists on both sides of the political aisle routinely announce that the American Dream is dead. According to them, the game has been rigged by elites, workers can't get ahead, wages have been stagnant for decades, and the middle class is dying. Michael R. Strain, director of economic policy studies at the American Enterprise Institute, disputes this rhetoric as both wrong and dangerous. In this succinctly argued volume, he shows that, on measures of economic opportunity and quality of life, there has never been a better time to be alive in America. He backs his argument with overwhelming—and underreported—data to show how the facts favor realistic optimism. He warns, however, that the false prophets of populism pose a serious danger to our current and future prosperity. Their policies would leave workers worse off. And their erroneous claim that the American Dream is dead could discourage people from taking advantage of real opportunities to

better their lives. If enough people start to believe the Dream is dead, they could, in effect, kill it. To prevent this self-fulfilling prophecy, Strain's book is urgent reading for anyone feeling the pull of the populists. E. J. Dionne and Henry Olsen provide spirited responses to Strain's argument.

Talking About Death Won't Kill You Aug 20 2021
This practical handbook will equip readers with the tools to have meaningful conversations about death and dying. Death is a part of life. We used to understand this, and in the past, loved ones generally died at home with family around them. But in just a few generations, death has become a medical event, and we have lost the ability to make this last part of life more personal and meaningful. Today people want to regain control over health-care decisions for themselves and their loved ones. Talking About Death Won't Kill You is the essential handbook to help Canadians navigate personal and medical decisions for the best quality of life for the end of our lives. Noted palliative-care educator and researcher Kathy Kortes-Miller shows readers how to identify and reframe limiting beliefs about dying with humor and compassion. With robust resource lists, Kortes-Miller addresses

**advance care plans for ourselves and our loved ones
how to have conversations about end-of-life wishes with loved ones
how to talk to children about death
how to build a compassionate workplace
practical strategies to support our colleagues
how to talk to health-care practitioners
how to manage challenging family dynamics as someone is dying
what is involved in medical assistance in dying (MAID)
Far from morbid, these conversations are full of meaning and life — and the relief that comes from knowing what your loved ones want, and what you want for yourself.**
