This report discusses the findings of a nationwide study on the use of private prisons in the United States. The number of these prisons grew enormously between 1987 and 1998, with proponents suggesting that allowing facilities to be operated by the private sector could result in cost reductions of 20%. The study examined the historical factors that gave rise to the higher incarceration rates, fueling the privatization movement, and the role played by the private sector in the prison system. It outlines the arguments, both in support of and opposition to, privatized prisons, reviews current literature on the subject, and examines issues that will have an impact on future privatizations. The report concludes that, rather than the projected 20-percent savings, the average saving from privatization was only about 1 percent, and most of that was achieved through lower labor costs. Nevertheless, there were indications that the mere prospect of privatization had a positive effect on prison administration, making it more responsive to reform. From the factory to the road, browse through more than 170 cool cars--from hatchbacks to hybrids--in DK's Pocket Genius: Cars. Trace the history of the automobile from early vintage cars to modern concept cars, limousines to coupes, and minivans to sports cars in this reference guide perfect for children ages 8-12. Gary Soto writes that when he was five "what I knew best was at ground level." In this lively collection of short essays, Soto takes his reader to a ground-level perspective, resreating in vivid detail the sights, sounds, smells, and textures he knew growing up in his Fresno, California, neighborhood. The "things" of his boyhood tie it all together: his Buddha "splotted with gold," the taps of his shoes and the "engines of sparks that lived beneath my soles," his worn tennies smelling of "summer grass, asphalt, the moist sock breathing the defeat of basesall." The child's world is made up of small things--small, very important things. Doping has become one of the most important and high-profile issues in contemporary sport. Shocking cases such as that of Lance Armstrong and the US Postal cycling team have exposed the complicated relationships between athletes, teams, physicians, sports governing bodies, drugs providers, and judicial systems, all locked in a constant struggle for competitive advantage. The Routledge Handbook of Drugs and Sport is simply the most comprehensive and authoritative survey of social scientific research on this hugely important issue ever to be published. It presents an overview of key topics, problems, ideas, concepts and cases across seven thematic sections, which include chapters addressing: The history of doping in sport Philosophical approaches to understanding doping The development of anti-doping policy Studies of doping in seven major sports, including athletics, cycling, baseball and soccer In-depth analysis of four of the most prominent doping scandals in history, namely Ben Johnson, institutionalized doping in the former GDR, the 1998 Tour de France and Lance Armstrong WADA and the national anti-doping organizations Key contemporary debates around strict liability, the criminalization of doping, and zero tolerance versus harm reduction Doping outside of elite sport, in gyms, the military and the police. With contributions from many of the world's leading researchers into drugs and sport, this book is the perfect starting point for any advanced student, researcher, policy maker, coach or administrator looking to develop their understanding of an issue that has had, and will continue to have, a profound impact on the development of sport. A critical overview of the highly explosive and widely discussed musical artform popularly called gangsta rap. Bakari Kitwana examines the ways Black culture, male-female relationships, sexism, white supremacy (racism) and gun violence converge in the controversial rap music. Despite their attempts to forge Black unity, current heated debates about gangsta rap--across genders and generations--seem to create a greater divide. This handbook provides us with a starting point from which rap artists, community activists, religious groups, women's organizations, youth, and parents can view gangsta rap in its political, cultural, and social context.--Page [4] of cover. In this path-breaking book, David Epstein and Sharyn O'Halloran produce the first unified theory of policy making between the legislative and executive branches. Examining major US policy initiatives from 1947 to 1992, the authors describe the conditions under which the legislature narrowly constrains executive discretion, and when it delegates authority to the bureaucracy. In doing so, the authors synthesize diverse and competitive literatures, from transaction cost and principal-agent theory in economics, to information models developed in both economics and political science, to substantive and theoretical work on legislative organization and on bureaucratic discretion. In Sundial of the Seasons, beloved New York Times nature writer Hal Borland (1900-1978) guides readers day-by-day through the seasonal changes of the natural world. With humility, wit, and wisdom he celebrates the everyday events of life in the country. This collection of his "outdoor editorials" will bring you daily joy and inspiration. Drawing on the latest contemporary research from an internationally acclaimed group of scholars, Law, history, colonialism brings together the disciplines of law, history and post-colonial studies in a singular exploration of imperialism. In fresh, innovative essays from a range of disciplinary backgrounds, this collection offers exciting new perspectives on the length and breadth of empire. As issues of native title, truth and reconciliation commissions, and access to land and natural resources are contested in courtrooms and legislation of former colonies, the disciplines of law and history afford new ways of seeing, hearing and creating knowledge. Issues explored include the judicial construction of racial categories, the gendered definitions of nation-states, the historical construction of citizenship, sovereignty and land rights, the limits to legality and the charting of empire, constructions of madness among colonised peoples, reforming property rights of married women, questions of legal and historical evidence, and the rule of law. This collection will be an indispensable reference work to scholars, students and teachers. Since the mid-1980s, Britain's Simon Watney has been one of the leading voices in the international field of HIV/AIDS education. Practices of Freedom demonstrates the failure of national institutions, from the government to the press, to understand and effectively fight this epidemic. Watney directs attention of the most urgent needs in American and international AIDS work. The Trump administration violated the rights of migrant children who fled brutal violence in the Northern Triangle of Central America. Their rights are human rights. This book explores the administration's policies and practices of family separation at the U.S. southern border and its confinement of migrant children that, in some cases, experts describe as torture. Specific connections are made between harmful actions on the part of government officials and agencies, and provisions that protect against them in The Convention on the Rights of the Child and four other UN conventions. Awareness of the violations and the safeguards afforded to children may help preserve children's human rights. The book also examines efforts of humanitarian organizations, courts, and legislators to reclaim and defend migrant children's rights. The author's research includes information from international and national government documents, news reports, and interviews and stories that resulted from networking with advocates in both Arizona and Mexico. The young asylum seekers were called "criminals" and "not-innocent" by the President. However, his narrative is contradicted by vignettes that describe children's own experiences and beliefs and by photographs of them taken by advocates in Arizona and by the author in shelters in Mexico where families await asylum. Traces the history of black men in America using a tough-guy image to obscure their anger and disappointment over their roles in society back to their origins in Africa and the slave era. The ultimate source for risk management information Before entering into any investment, the risk of that venture must be identified and quantified. The Handbook of Risk provides in-depth coverage of risk from every possible angle and illuminates the subject by covering the quantitative and behavioral issues faced by investment professionals on a day-to-day basis. This valuable reference offers a prescriptive and descriptive treatment of risk management for those looking to control, contain, and minimize the risk of their investments. The Handbook of Risk is also a perfect companion for professionals looking to complete IMCA certification courses. Ben Warwick (Denver, CO) is the "Market

In November 2012, voters in Colorado and Washington passed landmark measures to legalize the production and sale of cannabis for social use—a first not only in the United States but also the world. Medical cannabis is now legal in twenty states and Washington, D.C., and more than one million Americans have turned to it in place of conventional pharmaceuticals. Yet the federal government refuses to acknowledge these broader societal shifts and continues to raid and arrest people: 49.5 percent of all drug-related arrests involve the sale, manufacture, or possession of cannabis. In the first book to explore the new landscape of cannabis in the United States, investigative journalists Alyson Martin and Nushin Rashidian present a deeply researched, insightful story of how recent developments tie into cannabis's complex history and thorny politics. Reporting from nearly every state with a medical cannabis law, Martin and Rashidian enliven their book with in-depth interviews with patients, growers, doctors, entrepreneurs, politicians, activists, and regulators. They whisk readers from the federal cannabis farm at the University of Mississippi to the headquarters of the ACLU to Oregon's "World Famous Cannabis Café." They present an expert analysis of how recent milestones toward legalization will affect the war on drugs both domestically and internationally. The result is an unprecedented and lucid account of how legalization is manifesting itself in the lives of millions. *A New Leaf* offers an essential guide for anyone who wants to understand the far-ranging implications of this rapidly changing drug landscape. Explaining U.S. Imprisonment builds on and extends some of the contemporary issues of women in prison, minorities, and the historical path to modern prisons as well as the social influences on prison reform. Contents: the purposes and nature of strategy (a comprehensive 10-year plan); profile of drug abusers (trends in youth drug abuse; health consequences; cost of drug-related crime; illegal drugs remain available); strategic goals and objectives (demand and supply reduction; goals and objectives; measures of effectiveness); a comprehensive approach (youth oriented initiatives; initiatives to reduce drug-related crime and violence; reduce health and social problems; shield our frontiers; reduce drug availability); and resources to implement the strategy. Celebrating the sesquicentennial anniversary of the completion of the first transcontinental railroad in the United States, *After Promontory: One Hundred and Fifty Years of Transcontinental Railroad* profiles the history and heritage of this historic event. Starting with the original Union Pacific—Central Pacific lines that met at Promontory Summit, Utah, in 1869, the book expands the narrative by considering all of the transcontinental routes in the United States and examining their impact on building this great nation. Exquisitely illustrated with full color photographs, *After Promontory* divides the western United States into three regions—central, southern, and northern—and offers a deep look at the transcontinental routes of each one. Renowned railroad historians Maury Klein, Keith Bryant, and Don Hofsommer offer their perspectives on these regions along with contributors H. Roger Grant and Rob Krebs. At the outset of the twentieth century, malaria was Italy's major public health problem. It was the cause of low productivity, poverty, and economic backwardness, while it also stunted literacy, limited political participation, and undermined the army. In this book Frank Snowden recounts how Italy became the world center for the development of malariology as a medical discipline and launched the first national campaign to eradicate the disease. Snowden traces the early advances, the setbacks of world wars and Fascist dictatorship, and the final victory against malaria after World War II. He shows how the medical and teaching professions helped educate people in their own self-defense and in the process expanded trade unionism, women's consciousness, and civil liberties. He also discusses the antimalarial effort under Mussolini's regime and reveals the shocking details of the German army's intentional release of malaria among Italian civilians—the first and only known example of bioterror in twentieth-century Europe. Comprehensive and enlightening, this history offers important lessons for today's global malaria emergency. During the past decade, administrative law has experienced remarkable development. It has consistently been one of the most dynamic and potent areas of legal innovation and of judicial activism. It has expanded its reach into an ever broadening sphere of public and private activities. Largely through the mechanism of judicial review, the judges in several jurisdictions have extended the ambit of the traditional remedies, partly in response to a perceived need to fill an accountability vacuum created by the privatisation of public enterprises, the contracting-out of public services, and the deregulation of industry and commerce. The essays in this volume focus upon these and other shifts in administrative law, and in doing so they draw upon the experiences of several jurisdictions: the UK, the US, Canada, Australia and New Zealand. The result is a wide-ranging and forceful analysis of the scope, development and future direction of administrative law. When novelists Deeanne Gist and J. Mark Bertrand first met in a Houston critique group, they never expected where friendship would take them. She wrote romance; he wrote crime novels. But growing respect for each other's work culminated in the decision to try blending their talents into this wonderfully engaging story merging romance and mystery. Rylee Monroe walks dogs in old-money Charleston, a part of the city recently targeted by a daring thief. Logan Woods works the crime beat for the local paper but dreams of a life as a nonfiction writer. When the string of robberies takes a strange twist, Logan sees the making of a once-in-a-lifetime book that seems to circle around this charming, eye-catching dogwalker. But pursuing the truth means ignoring that he seems to be falling for her. And what is she hiding in her past that could crack the story wide open? Amelia Kurt was different. And she knew it. That didn't stop her from loving her best friend, Annabelle Johnson. They spent an entire summer making love, and growing into what was promising to be the only relationship either ever knew. Then, one day, the unexpected happens. Anna disappears. No reason, no forwarding address, no number. She was simply gone. Eleven years later, Anna returns. Her truth is heartbreaking but it's only the beginning of their journey to recovery. With a new preface by the author. Ten years after his murder, Tupac Shakur is even more loved, contested, and celebrated than he was in life. His posthumously released albums, poetry, and motion pictures have catapulted him into the upper echelon of American cultural icons. In *Holler If You Hear Me*, "hip-hop intellectual" Michael Eric Dyson, acclaimed author of the bestselling *Is Bill Cosby Right?*, offers a wholly original way of looking at Tupac that will thrill those who already love the artist and enlighten those who want to understand him. This book analyses the way that HIV/AIDS is often narrativised and represented in contemporary world cultures, as well as the different strategies of remembrance deployed by different (sub)cultural groups affected by the illness. Through a close study of a variety of cultural texts; including cinema, literature, theatre, art and photography amongst others, it demonstrates the trajectory that such narratives and representations have undergone since the advent of the 'discovery' of the disease in the 1980s. Acknowledging the central - yet often overlooked - role that cultural products have played in the construction of public opinion towards the condition itself and those who suffer it, this ground-breaking volume focuses on a variety of narratives, as well as strategies of coping with HIV/AIDS that have emerged across the globe. Bringing together research on the UK, North and South America, Africa and China, it provides rich textual analyses of the ways in which the HIV positive body has been portrayed in contemporary culture, with attention to the differences between specific national contexts, whilst keeping in view a space of commonality amongst the different experiences reflected in such texts. As such, it will be of interest to social scientists and scholars of cultural and media studies, concerned with cultural production and representations of the body and sickness. Combining our extensive mapping experience and unrivalled destination knowledge, our first dedicated atlas is packed with insightful commentary and inspiring images to help you explore the world and plan trips with ease. Each large page of mapping is accompanied with top sights and activities, while popular regions are presented at greater scale. 'Interspersed with acts of breathtaking linguistic daring.' Charlotte Mendelson, *Observer Book of the Year* Opening with a powerful and tender 'Ode to the Hymen', Sharon Olds uses this age-old poetic form to address many aspects of herself, in a collection that is centred around the female body and female pleasures, and touches along the way on parts of her own story which will be familiar from earlier works, each episode and memory now burnished by the wisdom and grace of looking back. In such poems as 'Ode to My Sister', 'Ode of Broken Loyalty', 'Ode to My Whiteness', 'Blow Job Ode', 'Ode to the Last 38 Trees in New York City Visible from This Window', Olds treats us to an intimate self-examination that, like all her work, is universal and by turns searing and charming in its honesty. From the early bodily joys and sorrows of her girlhood to the recent deaths of those dearest to her – the 'Sheffield Mountain Ode' for Galway Kinnell is one of the most stunning pieces here – Olds shapes her world in language that is startlingly fresh, profound in its conclusions, and life-giving for the reader. In this assessment of national and regional drug policies, the contributors analyze the magnitude and structure of the illicit drug market, the impact of the "war on drugs", the utility of therapy and treatment and the implications of legalization. *Day Bang* is a 201-page book that teaches you how to pick up women during the day, primarily in a coffee shop, clothing store, bookstore, grocery store, subway, or on the street. "Two kindred spirits find each other in this beautifully written memoir about the human-animal bond" (Temple Grandin, author of *Animals in Translation*). When Susan Richards agreed to take on the care of one of the abused horses just rescued by the local SPCA, she didn't know it was about to open a new chapter in her life. Things had not always been easy for Susan—she had lost her mother at the age of five and was raised by uncaring relatives, married unhappily and divorced, and suffered from alcoholism. But while Susan is trying to capture the horse assigned to her, a skeletal mare named Lay Me Down walks into her trailer of her own volition. Susan already owns one mare and two geldings—the diva-like Georgia, boyish Tempo, and hopelessly romantic Hotshot—but it is with Lay Me Down that she forges a special, healing relationship that alters her life. Poignant and evocative, *Chosen by a Horse* is a book for anyone who has ever loved a horse, and for everyone who has ever lost a loved one. Sander L. Gilman, whose pioneering work on the history of stereotypes has become a model for scholars in many fields, here examines the images that society creates of disease and its victims. The Juilliard Music Adventure is an interactive educational game designed to introduce children to important musical concepts through a series of creative puzzles. Bill Cooper, former United States Naval Intelligence Briefing Team member, reveals information that remains hidden from the public eye. This information has been kept in Top Secret government files since the 1940s. His audiences hear the truth unfold as he writes about the assassination of John F. Kennedy, the war on drugs, the Secret Government and UFOs. Bill is a lucid, rational and powerful speaker who intent is to inform and to empower his audience. Standing room only is normal. His presentation and information transcend partisan affiliations as he clearly addresses issues in a way that has a striking impact on listeners of all backgrounds and interests. He has spoken to many groups throughout the United States and has appeared regularly on many radio talk shows and on television. In 1988 Bill decided to "talk" due to events then taking place worldwide, events which he had seen plans for back in the early '70s. Since Bill has been "talking," he has correctly predicted the lowering of the Iron Curtain, the fall of the Berlin Wall and the invasion of Panama. All Bill's predictions were on record well before the events occurred. Bill is not a psychic. His information comes from Top Secret documents that he read while with the Intelligence Briefing Team and from over 17 years of thorough research. "Bill Cooper is the world's leading expert on UFOs." -- Billy Goodman, KVEG, Las Vegas. "The only man in America who has all the pieces to the puzzle that has troubled so many for so long." -- Anthony Hilder, Radio Free America "William Cooper may be one of America's greatest heroes, and this story may be the biggest story in the history of the world." -- Mills Crenshaw, KTALK, Salt Lake City. "Like it or not, everything is changing. The result will be the most wonderful experience in the history of man or the most horrible enslavement that you can imagine. Be active or abdicate, the future is in your hands." -- William Cooper, October 24, 1989.
