**The Chinese Revolution in Historical Perspective** Jan 31 2020 This introduction to the social, political, and intellectual history of China offers new perspectives as it analyzes two crucial and interrelated questions. Schrecker proposes new approaches for conceptualizing and evaluating China's modern revolution and the long and often misunderstood Chinese past, clarifying a topic made more complex because the West and Western ideas have played crucial roles in the revolutionary process. The volume presents a concise history of China, reinterprets the revolution and its relationship to the past, and provides valuable insights into the problems of contemporary China. It is of importance for the general reader and should be useful as a text in courses in Chinese, comparative and world history.

**Anarchism in the Chinese Revolution** Apr 27 2022 Arif Dirlik's latest offering is a revisionist perspective on Chinese radicalism in the twentieth century. He argues that the history of anarchism is indispensable to understanding crucial themes in Chinese radicalism. And anarchism is particularly significant now as a source of democratic ideals within the history of the socialist movement in China. Dirlik draws on the most recent scholarship and on materials available only in the last decade to compile the first comprehensive history of his subject available in a Western language. He emphasizes the anarchist contribution to revolutionary discourse and elucidates this theme through detailed analysis of both anarchist polemics and social practice. The changing circumstances of the Chinese revolution provide the immediate context, but throughout his writing the author views Chinese anarchism in relation to anarchism worldwide.

**Stepping Forth into the World** May 29 2022 The Chinese Educational Mission was one of the earliest efforts at educational modernization in China. As part of the Self-Strengthening Movement, the Qing government sent 120 students to New England to live and study for a decade, before they were abruptly summoned home to China in 1881. This book, based upon extensive research in local archives and newspapers, focuses on the experiences of the students during their nine-year stay in the United States. Historians of modern China will find this book highly relevant because of its detailed account of one of the major projects of the Self-Strengthening Movement. To date, there are at most two credible studies in English and Chinese on the Chinese Educational Mission; both are deficient in source citation and tend to dwell on the students' experiences after their return to China rather than during their stay in America. This volume will also appeal to specialists in Asian-American studies, for its comparing and contrasting the experiences of the Chinese students with those of other Chinese in the United States during a period of rising anti-Chinese sentiment, which culminated in the enactment of Chinese Exclusion in 1882. This book offers a slightly different perspective than most other works on the nature of the anti-Chinese movement, which may have been more class-based rather than race-based. The compare and contrast of students from China with those from Japan, which also sent large numbers of students to New England at roughly the same period of time, will be of interest to East Asian comparative historians as well. Edward J. M. Rhoads is a professor emeritus in history at the University of Texas at Austin. He is the author of *China's Republican Revolution: The Case of Kwangtung, 1895-1913* and *Manchus and Han: Ethnic Relations and Political Power in Late Qing and Early Republican China, 1861-1928*. "Rhoads has meticulously constructed the individual and collective histories of the 120 young men and boys sent by a beleaguered late Qing government to live and acquire English and Western knowledge in white New England families, schools and universities. As the vanguard of legions of Chinese students who have studied in the U.S. since, and as contemporaries of the far more numerous Chinese coolies whose paths they never crossed, this compelling study adds a surprising new chapter to early Asian American history." - Evelyn Hu-DeHart, Professor of History and Ethnic Studies; Director, Center for the Study of Race and Ethnicity in America, Brown University

**Spymaster** May 17 2021 The most feared man in China, Dai Li, was chief of Chiang Kai-shek's secret service during World War II. This sweeping biography of China's Himmler, based on recently opened intelligence archives, traces Dai's rise from obscurity as a rural hooligan and Green Gang blood-brother to commander of the paramilitary units of the Blue Shirts and of the dreaded Military Statistics Bureau: the world's largest spy and counterespionage organization of its time. In addition to exposing the inner workings of the secret police, whose death squads, kidnappings, torture,

and omnipresent surveillance terrorized critics of the Nationalist regime, Dai Li's personal story opens a unique window on the clandestine history of China's Republican period. This study uncovers the origins of the Cold War in the interactions of Chinese and American special services operatives who cooperated with Dai Li in the resistance to the Japanese invasion in the 1930s and who laid the groundwork for an ongoing alliance against the Communists during the revolution that followed in the 1940s. Frederic Wakeman Jr. illustrates how the anti-Communist activities Dai Li led altered the balance of power within the Chinese Communist Party, setting the stage for Mao Zedong's rise to supremacy. He reveals a complex and remarkable personality that masked a dark presence in modern China--one that still pervades the secret services on both sides of the Taiwan Strait. Wakeman masterfully illuminates a previously little-understood world as he discloses the details of Chinese secret service trade-craft. Anyone interested in the development of modern espionage will be intrigued by *Spy Master*, which spells out in detail the ways in which the Chinese used their own traditional methods, in addition to adapting foreign ways, to create a modern intelligence service.

**Chop Suey** Dec 24 2021 The book also explores how American tastes have been shaped by our relationship with the outside world, and how we've relentlessly changed foreign foods to adapt them to our own deeply rooted culinary preferences." Always illuminating, often exploding long-held culinary myths, this book opens a new window into defining what constitutes American cuisine."--BOOK JACKET.

**Chinese in the Post-Civil War South** Jan 25 2022 In much of the United States, immigrants from China banded together in self-enclosed communities, "Chinatowns," in which they retained their language, culture, and social organization. In the South, however, the Chinese began to merge into the surrounding communities within a single generation's time, quickly disappearing from historical accounts and becoming, as they themselves phrased it, a "mixed nation." Lucy M. Cohen's *Chinese in the Post-Civil War South* traces the experience of the Chinese who came to the South during Reconstruction. Many of them were recruited by planters eager to fill the labor vacuum created by emancipation with "coolie" labor. The Planters' aims were obstructed in part by the federal government's determination not to allow the South the opportunity to create a new form of slavery. Some Chinese did, however, enter into labor contracts with planters—agreements that the planters often altered without consultation or negotiation with the workers. With the Chinese intent upon the inviolability of their contracts, the arrangements with the planters soon broke down. At the end of their employment on the plantations, some of the immigrants returned to China or departed for other areas of the United States. Still others, however, chose to remain near where they had been employed. Living in cultural isolation rather than in the China towns in major cities, the immigrants soon no longer used their original language to communicate within the home; they adopted new surnames, so that even among brothers and sisters variations of names existed; they formed no associations or guilds specific to their heritage; and they intermarried, so that a few generations later their physical features were no longer readily observable in their descendants. Based on extensive research in documents and family correspondence as well as interviews with descendants of the immigrants, this study by Lucy Cohen is the first history of the Chinese in the Reconstruction South—their rejection of the role that planter society had envisioned for them and their quick adaptation into a less rigid segment of rural southern society.

**Communicating Effectively with the Chinese** Feb 11 2021 How can North Americans improve their communication with the Chinese? A useful and efficient approach to understanding prevalent cultural assumptions underlying everyday Chinese communicative activities, *Communicating Effectively With the Chinese* Identifies and conceptualizes some of the distinctive communication practices in Chinese culture. Utilizing the self-OTHER perspective as a conceptual foundation, authors Ge Gao and Stella Ting-Toomey portray and interpret the dynamics of Chinese communication. They examine how self-conception, role and hierarchy, relational dynamics, and face affect ways of conducting conversations in Chinese culture. They explain why miscommunication between Chinese and North Americans takes place and suggest ways to improve Chinese/North American communication. By incorporating instances of everyday conversations, Gao and Ting-Toomey offer a realistic and clear illustration of the specific characteristics and functions of Chinese communication, as well as problematic areas of Chinese-North American encounters. *Communicating Effectively With the Chinese* will be widely used by professionals and academics in communication, intercultural communication, interpersonal communication, Asian studies, and race and ethnic studies.

WeChat and the Chinese Diaspora Jan 01 2020 WeChat (the international version of Weixin), launched in 2012, has rapidly become the most favoured Chinese social media. Globally available, equally popular both inside and outside China and widely adopted by Chinese migrants, WeChat has fundamentally changed the ways in which Mandarin-speaking migrants conduct personal messaging, engage in group communication and community business activities, produce and distribute news, and access and share information. This book explores a wide range of issues connected to the ways in which WeChat works and is used, across the world among the newest members of the Chinese diaspora. Arguing that digital/social media afford a great degree of individual agency, as well as a collective capacity for sustaining an 'imagined community', the book shows how WeChat's assemblage of infrastructure and regulatory frameworks, technical capabilities, content and sense of community has led to the construction of a particular kind of diasporic Chinese world, at a time marked both by China's rise, and anxiety about Chinese influence in the West.

The Chinese Pleasure Book Nov 03 2022 This book takes up one of the most important themes in Chinese thought: the relation of pleasurable activities to bodily health and to the health of the body politic. Unlike Western theories of pleasure, early Chinese writings contrast pleasure not with pain but with insecurity, assuming that it is right and proper to seek and take pleasure, as well as experience short-term delight. Equally important is the belief that certain long-term relational pleasures are more easily sustained, as well as potentially more satisfying and less damaging. The pleasures that become deeper and more ingrained as the person invests time and effort to their cultivation include friendship and music, sharing with others, developing integrity and greater clarity, reading and classical learning, and going home. Each of these activities is explored through the early sources (mainly fourth century BC to the eleventh century AD), with new translations of both well-known and seldom-cited texts.

A Social History of the Chinese Book Jan 05 2023 In this learned, yet readable, book, Joseph McDermott introduces the history of the book in China in the late imperial period from 1000 to 1800. He assumes little knowledge of Chinese history or culture and compares the Chinese experience with books

with that of other civilizations, particularly the European. Yet he deals with a wide range of issues in the history of the book in China and presents novel analyses of the changes in Chinese woodblock bookmaking over these centuries. He presents a new view of when the printed book replaced the manuscript and what drove that substitution. He explores the distribution and marketing structure of books, and writes fascinatingly on the history of book collecting and about access to private and government book collections. In drawing on a great deal of Chinese, Japanese, and Western research this book provides a broad account of the way Chinese books were printed, distributed, and consumed by literati and scholars, mainly in the lower Yangzi delta, the cultural center of China during these centuries. It introduces interesting personalities, ranging from wily book collectors to an indigent shoe-repairman collector. And, it discusses the obstacles to the formation of a truly national printed culture for both the well-educated and the struggling reader in recent times. This broad and comprehensive account of the development of printed Chinese culture from 1000 to 1800 is written for anyone interested in the history of the book. It also offers important new insights into book culture and its place in society for the student of Chinese history and culture. 'A brilliant piece of synthetic research as well as a delightful read, it offers a history of the Chinese book to the eighteenth century that is without equal.' - Timothy Brook, University of British Columbia 'Writers, scribes, engravers, printers, binders, publishers, distributors, dealers, literati, scholars, librarians, collectors, voracious readers — the full gamut of a vibrant book culture in China over one thousand years — are examined with eloquence and perception by Joseph McDermott in *The Social History of the Book*. His lively exploration will be of consuming interest to bibliophiles of every persuasion.' - Nicholas A. Basbanes, author of *A Gentle Madness, Patience and Fortitude, A Splendor of Letters, and Every Book Its Reader* Joseph McDermott is presently Fellow of St John's College, Cambridge, and University Lecturer in Chinese at Cambridge University. He has published widely on Chinese social and economic history, most recently on the economy of the Song (or, Sung) dynasty for the *Cambridge History of China*. He has edited *State and Court Ritual in China* and *Art and Power in East Asia*.

*Encountering the Chinese* Sep 08 2020 "A classic must-read for everyone coming to work or live in China." - Shelley Warner and Tony Voutas, cross-cultural trainers and founders of Asia Pacific Access Ltd, China China is in the midst of unprecedented economic and cultural growth. In the last decade alone, China joined the World Trade Organization, hosted the 2008 Olympics and experienced a remarkable, record-high increase in its foreign currency reserves. As these changes unfold, frequency of contact between the Chinese and Westerners is dramatically increasing in the office, the classroom and the home. With thought-provoking glimpses into history and tradition, *Encountering the Chinese* provides fundamental information on Chinese cultural norms and values, giving clear context for contemporary social standards. Readers will learn the etiquette necessary to build successful personal and professional relationships with the Chinese both inside and outside the People's Republic of China. This revised edition of *Encountering the Chinese* also explains how Chinese values are changing rapidly—and why it is more important than ever to keep up. For instance, compliments, once declined out of modesty, are now widely accepted in coastal cities; and some terms of address that were proper to use only a decade ago have grown offensive. *Encountering the Chinese* provides invaluable insight into the diverse and changing Chinese culture.

**Chinese in the Woods** May 05 2020 Though recognized for their work in the mining and railroad industries, the Chinese also played a critical role in the nineteenth-century lumber trade. Sue Fawn Chung continues her acclaimed examination of the impact of Chinese immigrants on the American West by bringing to life the tensions, towns, and lumber camps of the Sierra Nevada during a boom period of economic expansion. Chinese workers labored as woodcutters and flume-herders, lumberjacks and loggers. Exploding the myth of the Chinese as a docile and cheap labor army, Chung shows Chinese laborers earned wages similar to those of non-Asians. Men working as camp cooks, among other jobs, could make even more. At the same time, she draws on archives and archaeology to reconstruct everyday existence, offering evocative portraits of camp living, small town life, personal and work relationships, and the production and technical aspects of a dangerous trade. Chung also explores how Chinese used the legal system to win property and wage rights and how economic and technological change ultimately diminished Chinese participation in the lumber industry. Eye-opening and meticulous, *Chinese in the Woods* rewrites an important chapter in the history of labor and the American West.

*The American Woman in the Chinese Hat* Jul 31 2022 "An intense, incantatory, erotic novel . . . **China and Globalization in the Amazon** Jun 05 2020 *China and Globalization in the Amazon* examines Chinese investment in the Global South, with particular attention to industrial activity in Latin America. Based on ethnographic work conducted in several Chinese factories in the Amazon region of Brazil, whether private, partially private, or state-owned, it explores the impact of these factories on the lives of workers, specifically on wages, laws, and labor benefits, as well as the relationship between management and workers. Drawing on interviews with Brazilian workers, expatriate Chinese workers, union leaders, and factory managers, the author identifies a Chinese production model and sheds light on the implementation of externally defined work regimes that showed little engagement with the workforce in the region, together with practices that resulted in a technical or bureaucratic relationship with the worker, and the emergence of lower wages than the local average, as well as few concessions on labor benefits. A study of Chinese globalization and industrial expansion in the developing world, and the reactions of workers to the Chinese model of management, this volume will be of interest to scholars of the sociology of work and organizations, globalization, development studies, and politics.

*Voluntary Organizations in the Chinese Diaspora* Jan 13 2021 Do Chinese voluntary organizations continue to have a role in modern societies enmeshed in a globalizing world that questions continuation of the nation-state and ethnic identity? This book argues that Chinese voluntary organizations continue to play a significant role in both the established and new Chinese communities in the Diaspora. They are able to do so because of their ability to transform their organizational structure and functions. At the same time, they are able to reinvent their own images to suit their co-ethnic community and the wider polity. The uniqueness of this volume lies in its integration of historical and contemporary approaches to the study of traditional Chinese voluntary organizations in the Diaspora. The chapters explore how the Chinese voluntary organizations continue to fulfil the needs of the Chinese community in different parts of the world, and do this by both localizing and globalizing their functions and roles in the countries where

they have established roots. The contributors cover traditional Chinese voluntary organizations from Asia to Australia, North America and Europe examining not only their activities in established Chinese communities such as Singapore and Malaysia, but also in the new emerging Chinese communities in Canada and Eastern Europe. This allows the readers to compare and contrast the voluntary organizations across countries and across time. Readership for this book includes scholars and students of Chinese Studies, Asian Studies, Anthropology, Sociology, Diaspora Studies, History, Social Organizations and the general educated Chinese population.

**The Chinese Language in European Texts** Oct 10 2020 This detailed, chronological study investigates the rise of the European fascination with the Chinese language up to 1615. By meticulously investigating a wide range of primary sources, Dinu Luca identifies a rhetorical continuum uniting the land of the Seres, Cathay, and China in a tropology of silence, vision, and writing. Tracing the contours of this tropology, *The Chinese Language in European Texts: The Early Period* offers close readings of language-related contexts in works by classical authors, medieval travelers, and Renaissance cosmographers, as well as various merchants, wanderers, and missionaries, both notable and lesser-known. What emerges is a clear and comprehensive understanding of early European ideas about the Chinese language and writing system.

**The Chinese Enlightenment** Apr 03 2020 It is widely accepted, both inside China and in the West, that contemporary Chinese history begins with the May Fourth Movement. Vera Schwarcz's imaginative new study provides China scholars and historians with an analysis of what makes that event a turning point in the intellectual, spiritual, cultural and political life of twentieth-century China.

*To Save China, To Save Ourselves* Aug 08 2020 Combining archival research in Chinese language sources with oral history interviews, Renqiu Yu examines the Chinese Hand Laundry Alliance (CHLA), an organization that originated in 1933 to help Chinese laundry workers break their isolation in American society. Yu brings to life the men who labored in New York laundries, depicting their meager existence, their struggles against discrimination and exploitation, and their dreams of returning to China. The persistent efforts of the CHLA succeeded in changing the workers' status in American society and improving the image of the Chinese among the American public. Yu is especially concerned with the political activities of the CHLA, which was founded in reaction to proposed New York City legislation that would have put the Chinese laundries out of business. When the conservative Chinese social organization could not help the launderers, they broke with tradition and created their own organization. Not only did the CHLA defeat the legislative requirements that would have closed them down, but their "people's diplomacy" won American support for China during its war with Japan. The CHLA staged a campaign in the 1930s and 40s which took as its slogan, "To Save China, To Save Ourselves." Focusing on this campaign, Yu also examines the complex relationship between the democratically oriented CHLA and the Chinese American left in the 1930s.

**Women in the Chinese Enlightenment** Nov 30 2019 Centering on five life stories by Chinese women activists born just after the turn of this century, this first history of Chinese May Fourth feminism disrupts the Chinese Communist Party's master narrative of Chinese women's liberation, reconfigures the history of the Chinese Enlightenment from a gender perspective, and addresses the question of how feminism engendered social change cross-culturally. In this multilayered book, the first-person narratives are complemented by a history of the discursive process and the author's sophisticated intertextual readings. Together, the parts form a fascinating historical portrait of how educated Chinese men and women actively deployed and appropriated ideologies from the West in their pursuit of national salvation and self-emancipation. As Wang demonstrates, feminism was embraced by men as instrumental to China's modernity and by women as pointing to a new way of life.

The Allied Resupply Effort in the China-Burma-India Theater During World War II Aug 27 2019 Japan's attack on Pearl Harbor in 1941 secured for Chiang Kai-shek's Chinese Nationalist forces what no amount of pleading had been able to produce: an influx of U.S. supplies. This volume explores the strategies of the Allies in China, Burma and India in World War II and the politically charged campaign waged in that theater. After an overview of the Allied situation in early 1942, the work presents the personal accounts of six individuals who served as part of the resupply effort in the CBI theater: Captain Edward Goodman, Captain David C. Hall, Staff Sergeant Robert Boehm, Corporal Anthony R. Silva, Corporal Alexander McVean and Tech Sergeant Kenneth R. Quigley. The service of African Americans in the CBI theatre is also discussed in detail. Appendices contain information on the organization of a motor transport truck regiment in Persia during World War II and an extract from a December 1944 log of an Air Jungle Rescue Unit in Burma.
