Bowker's Complete Video Directory 2001

The Oxford History of the United States is by far the most respected multi-volume history of our nation. In this Pulitzer prize-winning, critically acclaimed addition to the series, historian Daniel Walker Howe illuminates the period from the battle of New Orleans to the end of the Mexican-American War, an era when the United States expanded to the Pacific and won control over the richest part of the North American continent. A panoramic narrative, What Hath God Wrought portrays revolutionary improvements in transportation and communications that accelerated the extension of the American empire. Railroads, canals, newspapers, and the telegraph dramatically lowered travel times and spurred the spread of information. These innovations prompted the emergence of mass political parties and stimulated America's economic development from an overwhelmingly rural country to a diversified economy in which commerce and industry took their place alongside agriculture. In his story, the author weaves together political and military events with social, economic, and cultural history. Howe examines the rise of Andrew Jackson and his Democratic party, but contends that John Quincy Adams and other Whigs--advocates of public education and economic integration, defenders of the rights of Indians, women, and African-Americans--were the true prophets of America's future. In addition, Howe reveals the power of religion to shape many aspects of American life during this period, including slavery and antislavery, women's rights and other reform movements, politics, education, and literature. Howe's story of American expansion culminates in the bitterly controversial but brilliantly executed war waged against Mexico to gain California and Texas for the United States. Winner of the New-York Historical Society American History Book Prize Finalist, 2007 National Book Critics Circle Award for Nonfiction The Oxford History of the United States The Oxford History of the United States is the most respected multi-volume history of our nation. The series includes three Pulitzer Prize winners, a New York Times bestseller, and winners of the Bancroft and Parkman Prizes. The Atlantic Monthly has praised it as "the most distinguished series in American historical scholarship," a series that "synthesizes a generation's worth of historical inquiry and knowledge into one literally state-of-the-art book." Conceived under the general editorship of C. Vann Woodward and Richard Hofstadter, and now under the editorship of David M. Kennedy, this renowned series blends social, political, economic, cultural, diplomatic, and military history into coherent and vividly written narrative.

John Dewey's Democracy and Education addresses the challenge of providing quality public education in a democratic society. In this classic work Dewey calls for the complete renewal of public education, arguing for the fusion of vocational education and for the necessity of universal education for the advancement of self and society. First published in 1916, Democracy and Education is regarded as the seminal work on public education by one of the most important scholars of the century.

In the past decade there has been an intense growth in the number of library publishing services supporting faculty and students. Unified by a commitment to both access and service, library publishing programs have grown from an early publication of student works, textbooks, research data, as well as books and journals. This growing engagement with publishing is a natural extensions of the academic library's commitment to support the creation of and access to scholarly resources.

This makes it a very flexible resource for both students and teachers to use. Key Features ? Up-to-date case studies are vital for Geography students so selected case studies are exclusively online, enabling information and statistics to be updated as required. ? The most comprehensive resource for implementing Australian Curriculum: Geography textbook, eBookPLUS and SkillBuilder and together with links to supporting case studies in the Jacaranda Atlas 8E. ? Activities are clearly structured around the General Capabilities and the seven concepts outlined in the Australian Curriculum. ? Activities provide an opportunity for students to apply their understanding of the concepts to the content. ? Each of the two units to be covered in each year level now has a customised Geographical Inquiry or Fieldwork module based on the popular ProjectsPLUS structure. These are designed to further develop students? Inquiry skills Each chapter opener: ? introduces the chapter and relates the content to students? lives ? Has a link to an introductory video to stimulate student interest at the start of the topic ? Includes starter questions to help students think about their existing knowledge and viewpoints. Geography SkillBuilder ? Introducing a completely new learning reference/resource ? Jacaranda Geography SkillBuilder, which comes free with Geography Alive. SkillBuilders which were in the textbook have been significantly enhanced and brought to life as an interactive online resource, available in eBookPLUS. ? Two skills are described in each chapter. Each skill is explained in a step by step ?recipe? and is supported by an eLesson practically demonstrates the steps involved in undertaking that skill. These ?how to? eLessons help visual learners see what to do and provide a model of what the finish product looks like ? Students then practise and apply that skill to the topic they are studying to deepen their understanding. Students can track their understanding of each skill as they gain instant feedback from questions. ? Skills are developed in context of topics and address the Geographical Inquiry and Skills strand. Geography Alive for the Australian Curriculum eBookPLUS is an electronic version of the textbook and a complementary set of targeted digital resources. The eBookPLUS features: ? a new video series to engage students at the start of each new topic ?
